

产品大类	标准号	代表牌号	厚度	宽度	用途及特点
家电用冷轧钢带 Cold rolled strip used for household electrical appliances	Q/ASB421	JD1	0.4-2.0	900-1580	具备较高的表面硬度，良好的板型，可进行简单成形。主要用于冰箱侧板、冰柜面板。 With high surface hardness, good flatness. Mainly used for refrigerator, freezer panel
		JD2			具有比 JD1 较大的延展性，用于制造冲压成形及较复杂变形加工的零部件。主要用于冰箱面板、洗衣机背板、液晶背板、控制器零件。 Has the ductility is much larger than JD1, used in the manufacture of stamping parts processing and complex deformation. Mainly used for refrigerator, washing machine, liquid crystal panel backplane, backplane controller parts
		JD3			深冲压用，具有比 JD2 更大的延展性，适用于制造深冲成形及复杂加工的零部件。主要用于微波炉等小家电用。 You can deep stamping, with greater ductility than the JD2, suitable for use in the manufacture of deep drawing forming and machining complex parts. Mainly used for microwave ovens and other small household appliances for.
